

## QUALITY POLICY

Magnético SA's management hereby undertakes to uphold this Quality Policy by designing, maintaining and continually improving the company's Quality Management System. We specialize in marketing, designing, developing, implementing, maintaining and operating IT-based software solutions which comply with the applicable regulatory and legal requirements, as well as providing related consulting services.

- We aim to supply our clients with innovative and creative solutions based on the latest technological platforms available, as well as games to enrich their communication, thus helping them stay ahead and providing them with a unique competitive advantage.
- With the goal of becoming a leading company in the field of web and mobile apps, our day-to-day work revolves around the latest IT trends in Latin America. Innovation and creativity are the two main tenets that set us apart from other companies, and we are mainly focused on the individual economic players likely to be early adopters of any new technologies on the market.
- We aspire to carry out our productive and creative processes in a pleasant environment, with a structured, yet free-flowing work dynamics which fosters wellness and professional stability for our employees and collaborators.
- We build stable, long-term relationships with our clients, suppliers, business partners, and colleagues from our professional community, and especially with every single person that makes up Magnético.
- We acknowledge the people that make up Magnético as our most valuable asset, and therefore we promote their personal development in a stimulating environment which fosters professional growth, initiative, teamwork and commitment.
